Adjustable Levels

Control the number of PhotoPlasma lamp on demand. Provide safer and healthier working environments.

Powerful & Mobile

Suitable for heavily contaminated area. Made by robust material. Easy to move from room to room.

Versatile Applications

Suitable for quick or long term air treatment.

BioZone® Air Purification Technology: PhotoPlasma™

PhotoPlasma™ is generated by airborne molecules such as oxygen and water vapour under the exposure of the specialized UV spectrum. It includes reactive oxygen species, free radicals, electrons, etc., which actively capture various air contaminants, and rapidly destroy their structures through a chain of reactions. In this way the contaminants are decomposed and converted into harmless end-products like carbon dioxide and water.
